Version #	Implemented By	Revision Date	Approved By	Approval Date	Reason
4.3	Bernard	23/06/2025	Operations Lead	23/06/2025	Learn Hustler Development roadmap, Backend web structuring, and Fire up landing page

Background and Purpose

This update focused on preparing the system's structure for long-term development. The goal was to set a clear starting point, streamline the backend, and organize the project around the Hustler development core roadmap.

Project Name: YohPal Market
Version Number: 4.3
Service Type: System Entry Setup – Project Structuring
Lead Service Provider(s): Bernard
Date: 23/06/2025

Purpose

- Clear out clutter and define the app's starting point.
- Structure the system for smoother growth.
- Use the existing landing page with plans for future enhancement.

Key Improvements

- Cleaned and reorganized core files.
- Used the current landing page for initial user access.
- Set the roadmap for future improvements.

Completed Work

- Removed outdated or misplaced files.
- Updated project development roadmap technically.
- Made the existing landing page the entry point.

Pending Work

- Improve the landing page experience.
- Link landing sections to working features.
- Add helpful guides for future developers and users.

Self-Assessment

The structure now feels cleaner and easier to expand. While the landing page is reused, it serves its purpose for now and offers space for creative upgrades ahead.

Key Benefits

- Smooth foundation for upcoming features.
- Easier for others to understand the project layout.

Challenges and Resolutions

- No challenge today.

Recommendations

- Begin backporting the existing pages build by Mr. David.
- Code cleanup and ensure clean separation of logics, as well as sync with Mr. David for most of development sprints.
- Get things inline to ensure each page is responsive & works as anticipated.
